
Bookapi

Release 1.0.0

Dillon Runke

Mar 23, 2021

CONTENTS

1	Adding a book	1
2	Getting book data	3
3	Getting books by genre	5
4	Getting all indexed books	7

ADDING A BOOK

To add a book, use this link template:

```
https://bookapi.tech/api/v1/add?title=(title)&author=(author)&genre=(genre)&
↪publisher=(publisher)&pubyear=(year published)
```

Make sure to replace the words in brackets with what you want to add!

GETTING BOOK DATA

To get book data, use this link template:

```
https://bookapi.tech/api/v1/get?title=(book title)
```

This will return a JSON document. Make sure to replace the words in brackets with an actual book title!

GETTING BOOKS BY GENRE

To get a list of books by genre, use this link template:

```
https://bookapi.tech/api/v1/getbygenre?genre=(genre)
```

Make sure you replace (genre) with the actual genre!

GETTING ALL INDEXED BOOKS

To get every indexed book, use the following link:

```
https://bookapi.tech/api/v1/getall
```

Do keep in mind that the data load will increase as the amount of indexed books gets bigger.

Bookapi is an API you can use to find information on most books released, if they've been added to the database.
